Profile

I am a highly motivated individual seeking to embark on my journey in the field of programming. With a solid foundation in object-oriented programming and data analysis, I have developed strong skills in utilizing Python libraries such as Pandas, NumPy, and Scikit-learn.

During my university studies, I had the opportunity to apply my programming skills by undertaking various projects that involved developing applications in C# using Windows Forms. These projects provided me with valuable hands-on experience in designing user-friendly interfaces and implementing functionality to meet specific requirements.

While my proficiency in C# is commendable, Python is my strongest language. I have a deep understanding of Python's syntax, libraries, and ecosystem. I have leveraged Python to tackle diverse programming tasks, including data analysis, machine learning, and web development. Additionally, I possess knowledge in HTML and CSS, allowing me to create visually appealing and responsive web interfaces. Furthermore, I have experience working with MySQL for database management and integration.

Skills

- Python
- MySQL
- C#
- HTML
- CSS
- OOP
- Problem Solving
- Effective Communication
