Profile

I am a highly motivated individual seeking my first professional experience in the world of programming. With a passion for technology and a strong interest in software development, I am eager to apply my skills and knowledge in a dynamic programming role.

In addition to my enthusiasm for programming, I also have experience running a small business focused on 3D printing. This entrepreneurial endeavor has provided me with valuable insights into project management, problem-solving, and customer relations. Through this experience, I have honed my ability to adapt to new challenges, work independently, and deliver high-quality results.

I have a solid foundation in programming languages such as Python, C# and HTML/CSS, and I am continuously expanding my knowledge through self-study and online courses. With a strong work ethic and a proactive approach to learning, I am ready to embark on a professional programming journey. I am excited to contribute my skills, creativity, and dedication to a team where I can grow as a programmer and make a positive impact.

Skills

- HTML
- CSS
- Python
- MySQL
- C#
- Problem Solving
- Effective Communication
